

Restaurant Renovation Plan

Presented By:

Kaitlyn O'Shaughnessy, Michael Anthony,
Elizabeth Janicek, & Jacob Dezern

Project Scope & Charter

Our goal is to redesign an old restaurant location in the park to attract guests with new flavors, experiences, and memories.

La Cucina (Festa)

- Previously a pizza buffet
- Currently used for festival & Coca-Cola stand production

Consulted Professionals

- Design & Engineering Team
- Chef Justin Watson
- Supervisors Kimberly Damon & Richard Heartless

Name & Theming

Our plan consists of tying in the existing theming in Festa and remodeling the new restaurant with Roman farmers markets & the gods/goddesses in mind.

The goddess we have decided to primarily use is Fornax. The Roman goddess who personified the oven, protecting the grain, and overseeing the baking process.

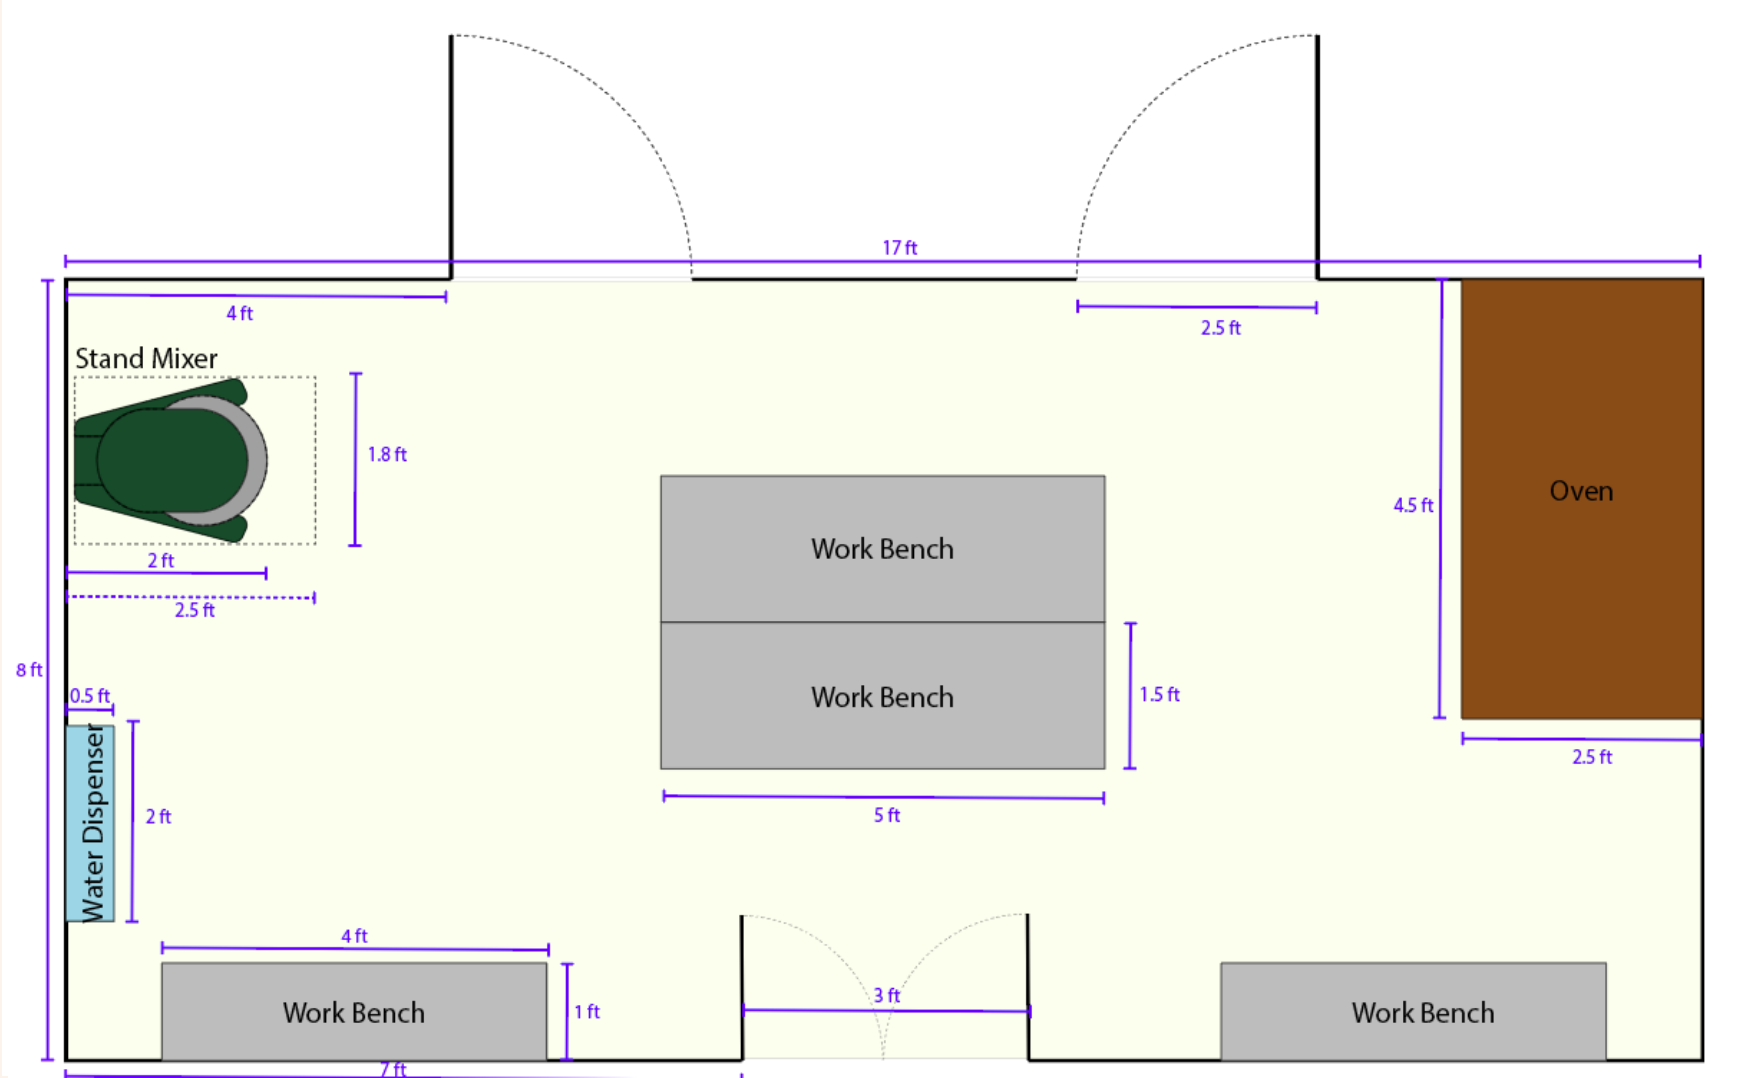

Using this information, our team decided to name the new building “**Fornax’s Fork**”

Renovation Timeline

[illegible]

New Bakery Design

New Equipment Costs

40 Quart Stand Mixer (with guard & attachments): \$2,249

40 Quart Stainless Steel Bowls (x2): \$1,098

30x60 Prep Tables (x2): \$360

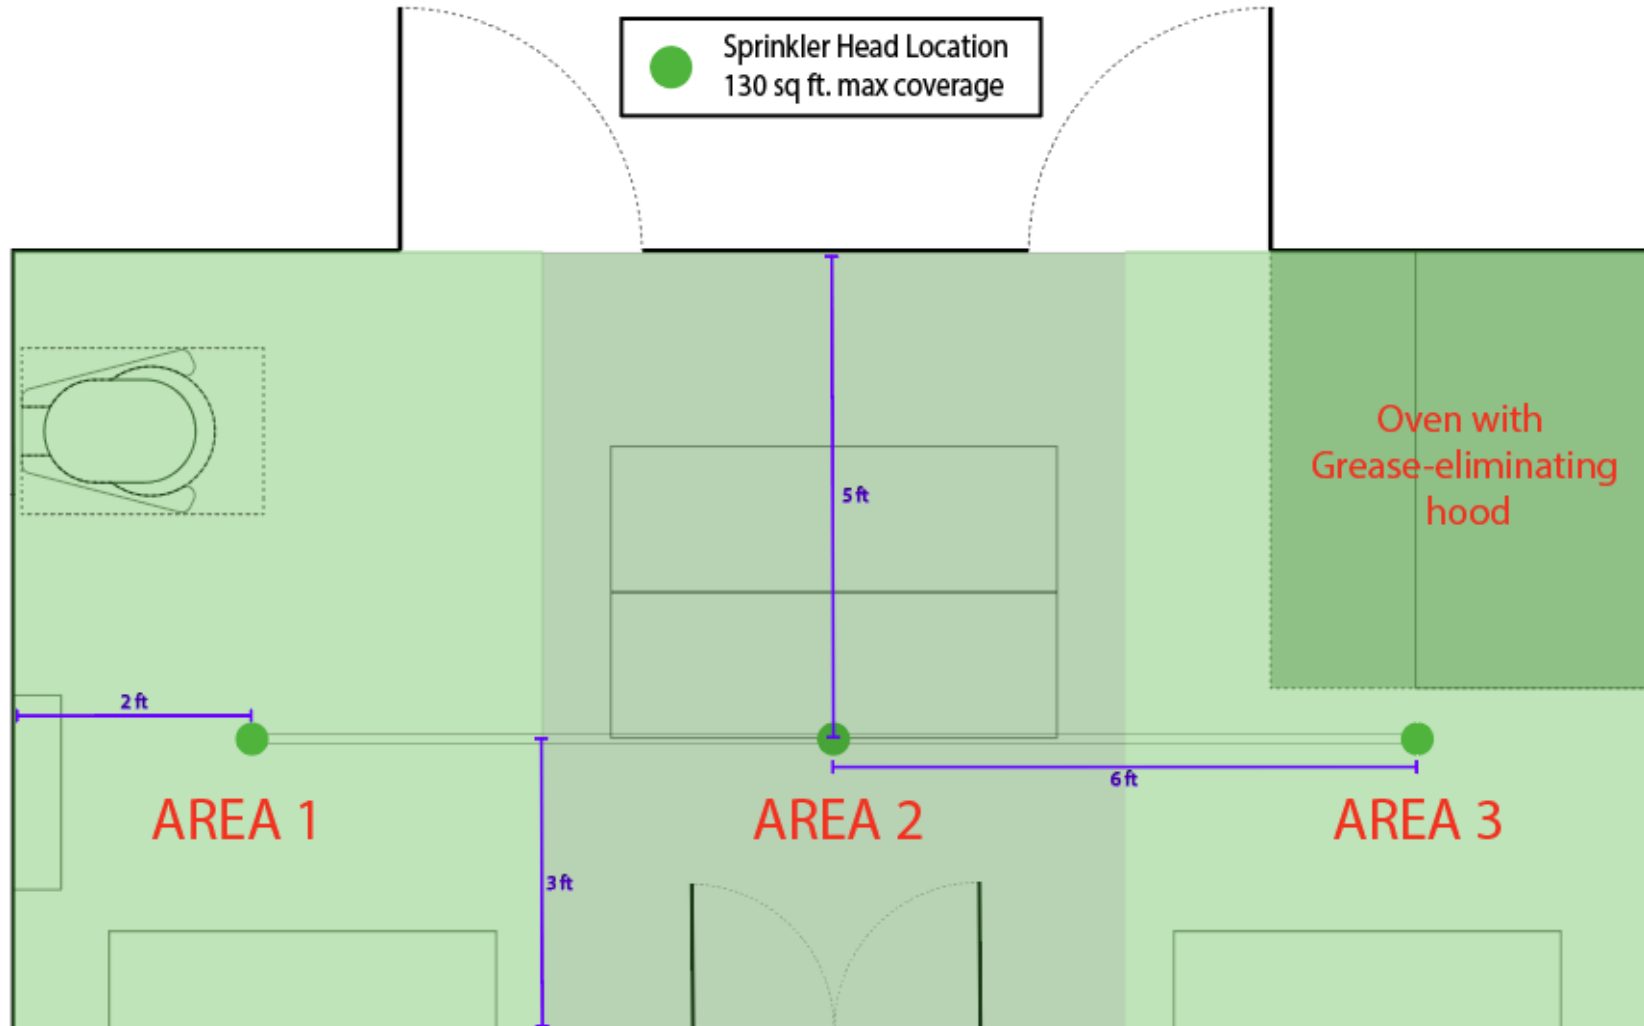

30x48 Prep Tables (x2): \$310

Double Convection Oven: \$4,899

Bakery Safety Plans

Bakery Safety Plans

- **Complaint with NFPA 96 for fire and ventilation control**
 - Exhausts for grease-laden and smoke producing equipment
 - **Compliant with OSHA guidelines for worker safety**
 - Emergency exits, slip-resistant flooring, ergonomic workstation heights, fire suppression alignment
 - **Follows NSF International Standards for Sanitation**
 - Equipment has smooth corners and no hidden crevices, is built with corrosion-resistant material, and food must be at least 6 in above the ground.
-

Front of House Design

Featured Desserts

We researched some traditional Roman desserts that would be easy to add into the current production of the bakery and found a few options that would have the ability to be produced.

Maritozzi – Fluffy brioche style buns filled with whipped topping & dusted with confectioners' sugar

Libum – A simple Roman cheesecake crafted using ricotta cheese & drizzled with honey

Bakery Logistics

Base Staffing & Hours

- FOH operations:
 - 11am-9pm
 - Mon-Sun
 - Use ambassadors who are already trained in F&B.
- BOH operations
 - 6:30am-12pm
 - Mon-Sat
 - Hire specialty ambassadors & **new supervisors** that have experience in BOH bakery operations.

Specialty Staffing & Hours

- Food & Wine Festival
 - Normal FOH hours
 - Reduced BOH weekend hours
 - Bier Fest Brews & BBQ
 - Normal FOH hours
 - Reduced BOH weekend hours
 - Howl-O-Scream
 - 11am-6pm
 - Fri-Sun
 - Christmas Town
 - 3pm-9pm
 - Mon-Fri
-

Costs and Pricing

- Maritozzi

- Dinner rolls = \$94.71 per 100 rolls
- Whip filling = \$30.96
 - \$125.67 per batch
 - \$1.26/each

- Libum

- \$204.54 per 96 loaves, 6 slices each
- \$0.36/each

- Lemon Ricotta Cupcake

- \$95.40 per 260
- \$0.37/each

- Shortbread cookies

- \$117.87 per ~350 cookies
- \$0.34/each, 2 per plate at \$0.68/plate

Pay per Plate

- 1 plate = \$10.49
- 2 plates = \$15.99
- 3 plates = \$19.99
- 4 plates = \$24.99

Contribution Margin

- 1 plate = min 88% & max 97%
- 2 plates = min 84% & max 95%
- 3 plates = min 81% & max 94.5%
- 4 plates = min 80% & max 94%

Projections

- From 1/1 - 8/7, The Sweet Shoppe's dessert category has made:
 - 20,666 sales
 - \$102,523.89 in gross profit
 - Making up 20.27% of their total sales in that time

If we assume that our new bakery would make yearly sales equal to that of the Sweet Shoppe's dessert category,

Then Fornax's Furnace would do 30,999 sales in the first year.

And if we assume sales within the pricing structure fall as such:

1 plate = 50% of sales (15,500)

2 plates = 25% (7,750)

3 plates = 15% (4,650)

4 plates = 10% (3,100)

Using the minimum contribution margin, then first year CM would come out to \$384,446.04

Divert 20% to labor = (\$76,889.21)

= \$307,556.83 EBITDA

Implementation Costs

Upfront costs

- Renovations \$ 50,000.00
 - Gas line \$ 0.00
 - Equipment \$ 10,000.00
 - Theming \$ 20,000.00
 - Hiring \$ 9,400.00
-

Total Upfront implementation cost =
\$89,400.00

Payback & ROI

(Initial investment) / (incremental profit) = Payback period

$$\$89,400 / \$307,556.83 = 3.4 \text{ months}$$

(Annual Incremental profit - Initial investment) / (Initial investment) = Return on Investment

$$(\$307,556.83 - \$89,400) / (\$89,400) = 2.44 \text{ or } 244\% \text{ ROI}$$

Other Considerations

- Conversion of La Cucina would eliminate the ability to use that space for birthday parties, possibly resulting in lost revenue
 - La Cucina's kitchen is used to store and make the food for Festa's Coke Market, as well as festival cooking, reducing efficiency, and potentially reducing output
 - La Cucina's placement in a more secluded section of the park may mean reduced sales and create a greater need for increased marketing and signage
 - During the demolition, equipment installation, painting, etc. The kitchen likely will be unusable, resulting in Festa's Coke Market operating with no food offerings, resulting in
-

Thank You!
